STILL ORIGINAL
IN SLAUGHTERING AND BREAKING

EFA at IFFA 2019 – Continuity In Quality And Service Or: Still Original

to the 100th company anniversary of Schmid & Wezel, its trade mark EFA presents state-of-the art solutions for slaughtering and braking at IFFA from May, 4th to May, 9th in Frankfurt, Germany in hall 8.1 booth A 74 – as usual.

In addition to the range of products in mature technology for industry and trade business, EFA will introduce especially

For the slaughtering of HOGS/SHEEP:

- Electrical Stunning Unit EFA VBE 6 for hogs and sheep, with program memory of stun parameters and electronic memory for upload and documentation of every operation sequence; different stunning grippers available.
- Upgraded hydraulic cutters EFA Z 79, EFA Z 80, EFA Z 100 of max. 4 kg total weight for one-hand operation.
- Rib Remover EFA RZ 100 with 2 optional bladeholders and selections of blades to match different sizes of carcasses.

For the slaughtering of CATTLE:

- EFA VBDK compressed air monitoring unit for high-efficiency stunner EFA VB 315.
- EFA rotary ridge comb with extraction unit to remove dirt furring.

Furthermore, the enhanced EFA- hydraulic power unit for high slaughtering capacities provides steady performance; its application, along with the improved range of electric- driven EFA cutters with quicker clamping time, higher operating safety and optional hose units in stainless steel, will improve results

Our trade fair team of practitioners looks forward to expert discussions and the exchange of experiences with costumers and interested persons from all over the world.

Look and assure yourself of our efficiency, service and support that we as our international dealers offer.

Welcome!
